

A 3D plot showing a path in a rectangular prism. The path starts at a green circle at (0,0,0) and ends at a red circle at (25,20,10). The path is composed of blue and red segments. The prism is divided into several colored rectangular regions: green, red, orange, purple, brown, pink, and yellow. The axes are labeled x, y, and z, with values ranging from 0 to 25.
